Laravel Certified Developer

Oliver Nybroe

Backend PHP (Laravel) Developer striving for knowledge and
challenges. he/him.
Copenhagen

Summary

I am a backend web developer with many years of experience with
PHP and especially building API's. Since the beginning of my career
as a programmer, I have been interested in PHP; It has always been
my go-to language when I needed something done as I feel it is easy
to work with and powerful. I have worked many years developing
API's in the Laravel framework. This only made me love PHP more
and especially the Laravel framework, as I find it superior to other
frameworks. I support open source projects and have helped on
many.
